OUR MISSION

Manufacturing and supplying crop protection and specialty chemicals world-wide by providing solutions to optimize farm productivity for the farmer through innovative and cost-effective products to provide the customer with better value for money.

INNOVATIONS FOR A PROFITABLE GROWTH :

Our research and development activities aim to convert market trends and scientific ideas quickly into successful innovations. Through new technologies we can tap into additional market opportunities.

VISION :

To be the world's leading innovator optimizing agricultural production, improving nutrition and enhancing quality of life.

VALUE :

Our business processes are oriented towards adding to long term value and competitiveness. In partnership with our customers, we help them be more successful. To accomplish this, we jointly discover business opportunities and develop products, procedures and services that are on a high scientific and technical level.

PRINCIPLES :

We seek advantages arising from changes in markets, science and society and use these as an opportunity for value enhancing growth.

We use our leading position to help shape scientific and technological progress, we identify new business opportunities and utilize synergistic effects arising from integrated research.

We develop and optimize our products and services, together with our customers, so that we can add value for both our customers and our Company

THE DESK OF DIRECTOR

The words that describe farmers come right out of the Indian spirit Self reliant, hard working, independent, proud and even courageous. For all its challenges, farming is still the background of India, the source of the food that keeps this country and much of the world healthy.

That's why we at **DIXON AGRICHEM PVT. LTD.** are more committed than ever to help farmers in India to do their jobs more effectively, more efficiently and more profitably than ever.

We started this company after realizing that your operation is different from farmers in the different regions and even from your neighbor just a few miles away. We work you your conditions, your goals, your financial realities to deliver products that have been developed, tested and proven to work in your environment. Then we follow it up with intimate knowledge of these product to help you maximize their genetic potential and chemical effectiveness.

To support the development of these crops and ensure insect and fungus free growth, we have a range of chemicals manufactured to match your requirements.

At a time when Indian values are more important than ever. the value of the Indian farmer is just as important. We take that fact very seriously and with a lot of pride.

Together we can make a difference !
